Languages: JavaScript, HTML5, CSS3, SQL
Frontend: React.js, Tailwind CSS, Redux, Bootstrap, EJS
Backend: Node.js, Express.js, REST APIs
Databases: MongoDB, Mongoose, MySQL
Tools: Postman, Hoppscotch, Git, GitHub, Figma
Core Concepts: API Testing, API Integration, Application Architecture, Performance Optimization, Authentication, CRUD Operations, Database Design, Responsive UI Development

PROJECTS

Tradr – Trading Platform | GitHub 09/2026 - Present
Developing a full-stack trading platform using React.js, Node.js, Express.js, and MongoDB. Integrated market data APIs to display stock prices, historical charts, market indices, top gainers, and top losers. Implemented backend APIs for managing watchlists, orders, holdings, and positions.

AtithiStay - Hotel Booking Web Application | Live Demo | GitHub 06/2026 – 08/2026
Built a full-stack hotel booking application using Node.js, Express.js, MongoDB, Mongoose, EJS, and Bootstrap, with authentication, property listing CRUD, and reviews. Added image uploads, server-side validation, and interactive maps via MapLibre GL JS and MapTiler for location-based visualization.

HealthHub - Digital Health Record Management System | GitHub 11/2025 – 04/2026
Built a full-stack healthcare application for Smart India Hackathon 2025 using Node.js, Express.js, MySQL, HTML, CSS, and JavaScript, with secure authentication and appointment booking. Included digital health records, Stripe payment integration, and role-based dashboards.

CERTIFICATES

- Full Stack Web Development (MERN Stack) - Apna College
- Fundamentals of Object Oriented Programming (NPTEL - Indian Institute of Technology, Roorkee)
- Data Base Management System (NPTEL - Indian Institute of Technology, Kharagpur)
- Software Testing (NPTEL – International Institute of Information Technology, Bangalore)
